**FY 94-99 BASE REALIGNMENT AND CLOSURE DATA
1993 COMMISSION**

The following are general points related to the information arrayed in this funding display:

- BRAC III actions within the Defense Information Systems Agency (DISA) implement consolidation of 58 Department of Defense automated data processing facilities into sixteen Megacenters; one Defense Information Processing Center will be retained at the Pentagon to provide processing service to the Joint activities. The majority of these organizations will be under DISA's operational element, DISA Western Hemisphere (WESTHEM). The remainder of the organizations will remain under the operational control of the parent service or agency until the workload is migrated to the Megacenter. The execution of this plan will close 42 of these sites after moving their data processing workload into the sixteen sites designated as Megacenters, and establish a small remote job entry/distributed print capability at some of the sites.
- Workload migrations are expected to be complete by early FY 1997, with optimization continuing in FY 1997-98. There are changes regarding which Megacenters will receive some of the workload migrations, and the migration dates of several Navy sites. These changes have resulted in adjustments in costs and savings by Megacenter as reflected in this budget submission.
- Savings from implementation of BRAC actions in this plan do not accrue to DISA or to its operational organization, DISA WESTHEM. The computer operations portion of DISA, under which all BRAC actions fall, is a Defense Business Operations Fund (DBOF) entity. As such, it is funded through collections from the Department of Defense services and agencies for whom data processing services are provided. Implementation of BRAC actions will result in reduced costs for these services to DOD, but will not reduce DISA's requirement for appropriated funds.
- This plan includes implementation of Defense Management Report Decisions 924 and 918. DMRD 924 directed consolidation within each service, followed by DMRD 918 which directed realignment of these organizations to DISA and further consolidation. This budget also includes funding for VSIP/VERA incentives.
- Funding identified as "Funded Outside of the Account" consists of those additional expenses required in the Megacenter for normal operations after collocation and consolidation of workload. These amounts will be included in the DBOF rates and the normal operating budget.

SCHEDULE:

FISCAL YEAR 1994: During FY 1994, DISA's initial funding allocation was \$79.0 million from the Base Closure Account III; this funding level was reduced by the FY 1994 BRAC rescission by \$20 million. Funds were used for planning and design and initial implementation.
